Mines and Mining Stocks

OPENING UP BIG

Silver-Lead Ore Strike Is Proving of Real Significance to the Mine.

Clifton, Deep Creek, July 18 .- At Gold Hill, which is situated in the central part of Cliffon mining district, the Western Utah Copper company is opening up some immense bodies of lead-silver ore. On the 30-foot level the ore body is being crosscut and is now over thirty feet wide, with no indications of the hanging wall. cut and is now over thirty feet wide, with no indications of the hanging wall. The same vein has been tapped on the 5%-foot level and cross-cutting is being pushed rapidly. Cross-cutting on the 600-foot lavel is going ahead and lead and iron are appearing, indicating a close proximity to the ore body. The ore is a lead carbonate carrying a good percentage of iron, making it an ideal smelting proposition. This impresse body of ore crops out on the surface, assuring the company 350 feet of stoping ground thus far. This lead-silver vein is separate and independent of the copper-gold vein, where the company has not less than 150,000 tons blocked out. There are fifteen miners now at work and more are being put on as room is made for them. General Manager Duncan MacVichie made an inspection of the ore bodies a few days ago and is more than pleased with the showing. While here he outlined new work which will keep Superintendent John Bergh rustling for some time.

Mr. MacVichie should be given credit for this work, as he has had to contend with men who had grave doubts as to the permanency of the ore bodies. Now that it has been demonstrated that the ore bodies go down, the knockers who have been giving the camp a black eye and saying the ore does not go down (none of them sinking a 10-foot hole) had better look for pastures new.

Copper Zone Two Miles Long.

Copper Zone Two Miles Long.

Paul Rodenhouse has returned to camp to rush work on his and J. P. Gardner's large holdings, on which the most im-portant strike of this season has been made in the opening up of immense de-

made in the opening up of immense deposits of quartz-porphyry, carrying good values in copper and gold.

Frank Little and Jay T. Roundy have seven claims about one-half mile south of the Gardner-Rodenhouse group, where copper can be traced for more than 200 feet across the zone, and further east the writer prospected the surface east and west for 200 feet, finding copper wherever the croppings were broken. It goes to show that this copper-bearing zone extends at least two miles in length and over one-half mile in width.

M. R. Evans, who owns a large group of claims on the Dutch mountain side, has a force of men at work and report comes from there that the property is looking encouraging, some fine silver-lead ore being extracted.

ore being extracted.

John Cobbley has a force of men at work on the Xmas group, which lies about one mile northeast of Gold hill. On this group high grade gold-bearing rock as well as silver and lead is found. With proper development a mine will be made on this ground.

and the stock is mostly owned by east-

Other Good Ones; Railroad Talk.

other Good Ones; Railroad Talk.

F. J. Guilmette is developing his property and is also looking after the W. B. and Judge Thompson holdings in this camp. The property is patented and held by Colorado and eastern parties.

Ed Emery, a Comstock ploneer, has acquired some valuable ground in this district. Mr. Emery is a pratical mining man, having been in nearly all the mining camps of the west, and says he never saw anything to equal the mineral showing found here. He predicts a great future for this camp.

The Minnehaha Mining & Milling company has done considerable development

pany has done considerable development work on its group of gold and copperwork on its group of gold and copperbearing claims, situated on the eastern end of the district. The company has 600 tons of high-grade ore on the dumps and several thousand tons blocked out. Work will be resumed on this property shortly.

Crown, Point—300 at 11/20, swift at 11/20, swi

shortly.

The Tonopah & Tidewater surveyors are working this way and will surely make connections with the Saltair railroad into Salt Lake. The Western Pacific railroad will have its surveyors in the field by the first of October, running a spur from the main line to Clifton, giving the district two roads. Things are looking bright for Deep Creek. Keep your eye on Clifton.

HELENA BANKER BUYS THE OLD BELMONT MINE

Helena, July 19.—The Belmont mine, near Marysville, which has produced upwards of \$2,000,000 in gold, has been purchased from the Longmaids of this city by Colonel Thomas Cruse, a Helena banker. The price was not made public, but it is said to involve a large sum. Cruso will operate it jointly with the Bald Moun-

Day's Holiday Only Serves to Make

Business a Little Less Lively. Sunday's rest for the mining exchange Sunday's rest for the mining exchange usually brings through an accumulation of orders that makes Monday's trading quite lively. The rule did not apply to yesterday's trading, for the volume of business done was lighter than it has been for a long time. The holiday spirit is abroad in the land and no one seems to care much whether school keeps or

BIGMERER

BIGMER

How New Company Is Formed.

A corporation to be known as the Utah Metals Mining company, with a capital of \$7,500,000, represented by 1,500,000 shares of a par value of \$5 each, is to be organized under the laws of Maine, to absorb the Bingham Metal company and the Bingham Central-Standard company. Of the capital stock, the Bingham Metal company of the capital stock, the Bingham Central-Standard company gets 300,000 shares of the new stock, or at the rate of approximately considered to the capital stock. STOCK MARKET REPORT
Standard company gets 300,000 shares of the new stock, or at the rate of approximately one for three, leaving 785,000 shares in the treasury of the new company. The Bingham Central-Standard company has a bonded Indebtedness of \$347,000, and the holders of these bonds have signed up, or practically all of them have, an agreement by which they will be at liberty to convert the bonds into stock of the new company within two years on a basis of \$2, or accept cash at the end of five years, or in April, 1911, with interest. After providing stock for this conversions scheme there will still remain, it is understood, about 612,000 shares in the treasury, a portion of which is to be underwritten at \$3 a share to provide a large working capital for the extensive development and equipment of the mines of the consolidated estate.

Bingham Metal's Strong Position.

In order that local interests in the Bingham Metal's Strong Position.

In order that local interests in the Bingham Metal's Strong Metal company, in particular, may understand just why it is the daily market comment of Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the with the range of prices of copper stocks and other Boston listings in which the west sinker and enterested, as well as a similar report on New York curb transactions, by James A. Pollock & Co., and from whom it is secured for use in this department of The Herald:

Boston, July 19.—The New York market opened strong and continued so during the early part of the day, selling off slightly at the close. The Boston market was rather quiet, with the exceptions of North Butte close. The Boston market was fer tax stamps. Accounts receivable. Cash and the provide a large buying order. This market looks as if in the near future it would broaden and the better class of stocks should sell very much higher. Foreign copper closed strong with fairly large sales.

Boston Copper Stocks.

Bingham Metal's Strong Position.

In orde

Bingham Central-Standard company, in particular, may understand just why it is that the Bingham Metal company appears to fare better than they do in the deal, it is necessary to explain only that, while their company owns about 500 acres of patented ground in the heart of the mineral zone of Bingham, it has an indebtedness of \$37,000 that must be taken care of, with no mmediate chance of so doing. On the other hand, the Bingham Metal company enters with an estate of 2.500 acres joining on to the west end of the Bingham Central-Standard possessions on which more than \$150,000 has been spent in development, equipment, patenting, etc., besides a wealth of timber, water rights, power plants and other 2.000 to 2,500 feet, begin opening the great fissures in Bingham Central-Standard ground at no small additional depth to present workings, and ultimately provide an outlet for the ore at a distance of about four miles from the International Smelting company's works, with a natural grade for a tramway over which to send the product of mine and mill to the reduction plant. These 'are the chief reasons why the holders of Bingham Central-Standard stock have had to be content with a proposition that will give them one share for three.

Consolidation

U. Cop. Col U. S. S., Co U. S. S., Co U. S. S., Co O. Col U. S. S., Co U. S., Co U. S. S., Co U. S., Co U. S., Co U. S. S., Co U. S., Co

Advantages of Consolidation.

Through the consolidation of these properties the Bingham Central-Standard property can be opened up during the next eighteen months at a depth of more than 400 feet below the level of its Jeff than 400 feet below the level of its Jeff Davis tunnel, while its Ridge claim will be pierced at a depth of 2,300 feet. The big tunnel from the Middle canyon side, will have to be driven about 11,000 feet to daylight on the Carr Fork side of the Bingham district, on Bingham Central ground and close to the Yampa, Boston Consolidated and other big mines of the Bingham camp that flank the possessions of the consolidated company now in process of formation. It is the purpose to use electric locomotives in operating this tunnel from the west end, beginning in September, and at the same time it is the purpose to make a survey and start from

September, and at the same time it is the purpose to make a survey and start from the Bingham Central side to meet it. In driving from the west 600 gallons of water a minute has already been tapped, and it is expected that double that amount will be developed by the time the tunnel is in another 3,000 feet.

The moving spirits in the consummation of this big deal are Walter B. Farmer of Boston, president and general manager of the Bingham Metal company, and W. E. Hubbard and other officials of the Bingham Central-Standard company. It has been mutually agreed and a contract has been signed, that will make Sam H. Treloar, the well known Butte miner, general manager of the Butte miner, general manager of the Utah Metal company's properties, while E. J. Baker, the efficient superintendent of the Middle canyon works, will con-tinue to drive the big bore from that side

of the range.

Thousands of tons of fine milling ore, with considerable shipping rock, has already been developed in Bingham Central-Standard ground, and this will be added to as the work progresses. Mr. Farmer and the lawyers who came out from Boston with him to look after the legal points in the merger deal, left for Boston vesterday noon to close everylegal points in the merger deal, left for Boston yesterday noon to close everything up on that end and start the new company going right. The personnel of the official household and other details that may have been omitted in this general outline of the scheme, will come out when the company is organized and the formal announcement is made.

PROPERTIES WORKING IN AMERICAN FORK

American Fork, Utah, July 19.—James Chipman, jr., and M. O. Randolph have returned from a trip of inspection to the Clipper & Silver King mine in American Clipper & Silver King mine in American Fork canyon. They give very promising reports of this property. It has been idle for some time, but a force of men will be put to work on the two-foot vein of carbonate ore they have and it is expected that some shipments will be made from the property before the season is over. Some very rich streaks of high-grade gold ore have been encountered, and Mr. Randolph, who is a heavy shareholder, predicts big things of this property in the near future.

The damage done to the canyon road will be repaired about the last of the com-

will be repaired about the last of the coming week, is the report of the men in charge of the work. When completed it is said that the road will be in better shape than for years. There is a force of about forty men and teams working

there now.

M. H. Williams, who has charge of the work on the Pittsburg mine in American Fork mining district, says work is now being pushed ahead with two shifts. They are developing an immense amount of sulphide ore and it is the intention of the company to ultimately build a mill to handle it.

Emigration Canyon Resort.

Free dancing Wednesday evening; prize waltz. Extra cer service 7:30 to 11 p. m.

to handle it.

J. C. Jenson and Heber Jex returned from a trip to the Mineral Flat, the Miller Hill and the Major Evans properties, in American Fork canyon district, Saturday.

Work at all these properties is progressing nicely. At the Mineral Flat the miners are in very interesting ground just at present, and it is looked for something important to be developed within the next few weeks. At the Major Evans development work is going ahead and several nice streaks of lead ore have been crosscut and the property has a very promising future. The Miller Hill property, which joins the Whirlwind and the Dutchman mines, is looked upon as one of the

Four carloads of ore from Utah mines were released from the Pioneer samples

yesterday. C. A. Short and H. R. Elliott, of the Gold Springs Mining & Power company, returned from a trip east Eunday night. Manager M. C. Morris of the Cupri company's Beaver county mines, says the shaft is now down 375 feet and bunches of the finest kind of copper ore are making in the bottom. He believes the contact is now being approached.

Manager Grant Snyder returned from a trip of inspection to the Cliff company's mines at Ophir Sunday night. He says everything is running along like clock-work and that the mine is looking better C. Dick, the mining engineer,

just returned from an examination of the Seven Troughs Mining company's prop-erty in the interests of John Dern, who recently became largely interested in the company. It is understood that Mr. Dick's company. It is understood that Mr. Dick's report is a most favorable one.

General Manager Colin McIntosh of the Ohio Copper company returned from the east Sunday night. He states that his company is now in fine financial condition and that the mill will be crowded to the earliest possible completion. It to the earliest possible completion. It will be started when the first two sections are ready, sixty to ninety days hence, when approximately 1,000 tons of ore a day will be converted into high grade copper concentrates.

Knights of Columbus excursion to Lagoon, Wednesday, July 21.
